

Features of StartAR

Let's StartAR

StartAR creates a learning bridge between kids & books through a mobile platform to help them concentrate in books and parents feel hassle-free about their kid's learning and attention.

With StartAR, kids become smart, intelligent, easy to care and during the primary school interviews parents feel confident about their kids. Kids love Digital. Instead of planting them in front of a TV screen or video games, give them the StartAR books and boost their imagination and creativity. StartAR includes learning languages (English & Hindi), General Knowledge, Counting and many more.

startAR

Want your Kids to be Smart and Intelligent?

Where the Digital India kids circle around.

StartAR, a Smart platform for Smart kids.

- Let your kids participate in Digital India movement through StartAR Study Application. This will not only make them smarter, it will develop the kid's learning ability to move forward with digital smart progressive education. More and more schools are using smart classes to engage students but smart classes are limited to schools.
- With StartAR you can bring the engagement to home using your Android Smartphone. StartAR application, turns learning into fun using the revolutionary Augmented Reality technology and Artificial Intelligence with our exclusive books and create a special connection between the books & afterwards the kids always love their books.
- StartAR creates a learning bridge between kids & books through a mobile platform to help them concentrate in books and parents feel hassle-free about their kid's learning and attention. It helps them to get rid of Digital addiction as they connect with books for a limited period.
- Kids love Digital. Instead of planting them in front of a TV screen or video games, give them the StartAR books and boost their imagination and creativity. StartAR includes learning languages (English & Hindi), General Knowledge, Counting and many more.
- It gets the job done for a working mom. For working parents now a days it's hard to pay attention to their kid's learning activities and keep monitoring the process. We made it simple using StartAR, just open the app, scan the books and let them learn by themselves.
- Download the StartAR Application from Google Play Store, and enter the 3D virtual world of learning with books. This is a new and unique technological concept where kids can watch and play with the book characters through the mobile screen using StartAR Books.
- This also makes interactive sounds, voice collisions along with 3D visuals to make kids easy to understand and pronounce their study content.

App available on
Google Playstore
